Devi Ahilya Vishwavidyalaya, Indore

Syllabus for B.Sc. Part-I, II and III (Optional subject- Microbiology) 2011 Onwards

Semester	Course title	Distribution of marks			
		CCE	Semester Exam	Practical Exam	Total
Sem-I	General Microbiology	15	85	50	150
Sem-II	Microbial Physiology and Biochemistry	15	85	50	150
Sem-III	Bacterial Genetics	15	85	50	150
Sem-IV	Immunology and Clinical Microbiology	15	85	50	150
Sem-V	Industrial Microbiology	15	85	50	150
Sem-VI	Applied and Environmental Microbiology	15	85	50	150

Scheme of practical examination in each semester			
	1. Major exercise	12 Marks	
Total marks- 50	2. Minor exercise-1	10 Marks	
Total marks- 50	3. Minor exercise-2	10Marks	
Duration- 6 Hrs.	4. Spotting	08 Marks	
Daration • 1115.	5. Viva-voce	05 Marks	
	6. Practical record	05 Marks

Devi Ahilya Vishwavidyalaya, Indore B.Sc. Part- I (Microbiology) Semester-I

Semester-I	General microbiology	CCE- 15 Marks		
Unit-1	History and Scope of Microbiology	End Exam 35 Marks		
	Contributions of Pioneers- Anton you I convert and	Robert Veck Die		
	Pasteur, Paul Ehrlich, Alexander Fleming and Joseph	Lister Roch, Edward Jenner; Lou		
	Branches of Microbiology and its development.			
	Spontaneous generation v/s Biogenesis.			
	Place of microbes in living world.			
	Beneficial and harmful microbes.			
	Microbes in extreme environments.			
init-ll	Tools and Techniques in Microbiology			
	Microscopy- Bright field, Dark field, Fluorescence, Phase contrast and Electron			
	microscopes.	ase contrast and Electron		
	Colorimetry, Centrifugation and Electrophoresis.			
	Tiou all oven Autoclave Luminar Air El-			
	Stains and Staining Techniques Dyes Classification			
	Stains and Staining Techniques-Dyes: Classification a (Monochrome, Negative) Differential (Cropp & A. 1)	nd types; Types of staining- Simp		
-	(Monochrome, Negative), Differential (Gram & Acid I Granules, Flagella, Spirochetes).	rast) and Special staining (Spore.		
	Wet mount and Hanging drop preparations.			
nit-III	Taxonomy and Morphology of Bacteria			
	Classification systems of prokaryotes. Bacterial nomen			
	Size, shape and arrangement of bacterial cells.	clature.		
i	Cell wall of Grara positive and positive 1	2		
į	Cell wall of Gram positive and negative bacteria (Protoplast, Spheroplast). Structures external to the cell wall, flogslight will.			
i	Structures external to the cell wall-flagella, pili, capsule, sheath and prosthecae. Structures internal to the cell wall-cell membrane, nuclear material, spores, cytoplasmic inclusions, magnetosomes and plasmids.			
İ	inclusions, magnetosomes and plasmids.	ear material, spores, cytoplasmic		
nit-IV				
	Eucaryotes, Acaryotes and Bacteria with unusual pr	operties		
	General characters and economic importance of – Fung Protozoans.	i (Yeast and Moulds), Algae and		
	Introduction to acellular forms of life- Viruses, Viriods, Structure of Bacterial Viruses.	Prions.		
	Classification and cultivation of Viruses.			
	Multiplication of Bacterial Viruses.			
	Bacteria with unusual properties Pinters China			
	Bacteria with unusual properties- Rickettsia, Chlamydia Cyanobacteria, Actinomycetes.	, Mycoplasma, Archaebacteria,		
	Control of Microorganisms	-		
	Fundamentals of control			
1	Physical methods of control T			
	Physical methods of control-Temperature, radiation, des	ssication, osmotic pressure and		
	Chemical methods of control- Phenol, alcohol, halogens	, heavy metals, dyes, detergents		
1 0	and the distribution of distribution and	antiseptics- Tube dilution		
1	nethod, Agar diffusion method, Phenol coefficient.	1		

hance 31.7.14 Bhasen 317/2014

31.7.14

List of Practicals

- 1. Principles, working knowledge of Instruments like Autoclave, pH meter, Incubator, Hot air oven, Centrifuge, Microscepe, Refrigerator, Colony counter, Laminar Air Flow.
- 2. Neutralization, cleaning and sterilization of glassware.
- 3. Measurement of microorganisms.
- 4. Preparation of culture media like Nutrient Agar and its uses.
- 5. Preparation of stains.
- 6. Motility of bacteria by Hanging drop method.
- 7. Staining procedures I- Simple staining Monochrome staining and Negative staining.
- 8. Strining procedures ||- Differential staining Gram Staining and Acid Fast Staining.
- 9. Staining procedures III- Special / Structural staining Cell wall staining, Capsule staining, Metachromatic Granule staining, Endospore staining, Spirochete staining.
- 10. Identification of some common fungi.

Scheme of Practical Examination- Semester -I

M.M. 50 (4 Hrs.)

Ex.1	Perform Gram staining of given bacterial culture.	[12]	
Ex.2	Perform Structural / Special Staining (Cell wall staining, Capsule staining,		
	Metachromatic Granule staining, Endospore staining, Spirochete staining).	[10]	
Ex.3	Perform wet mount of given lungal strain.	[10]	
Ex.4	Spotting.	[8]	
Ex. 5	Viva-Voce.	[5]	
Ex. 6	Practical Record	151

31.7.1

Semester-II	which obtain physiology and Diochemistry	CCE- 15 Marks End Exam 85 Marks				
Unit-I	Cultivation and preservation of bacteria	E				
	Nutrition and nutritional types of bacteria.					
	Bacteriological media and its types					
-1	Cultivation of aerobic and anaerobic microbes.					
	Pure culture and cultural characteristics.					
	Maintenance and preservation of cultures.					
Unit-II	Bacterial growth					
	Mathematical expression of bacterial growth.					
	Growth curve of bacteria.					
	Batch, continuous, synchronous and diauxic growth.					
	Factors affecting microbial growth.					
	Quantitative measurement of bacterial growth by cell mass, cell number and cell activity.					
Unit-III	Enzymes					
	General characters, classification and nomenclature of enzy	ymes.				
	Factors affecting enzyme activity.	4				
	Mechanism of enzyme action.					
	Regulation of enzyme activity.					
	Applications of enzymes.					
Unit-IV	Basic Biochemistry					
	Bonds of life- covalent, ionic and hydrogen bonds					
	General properties, classification and functions of – Carbo	hydrates, Lipids, Amino acids,				
	Proteins, Nucleic acids.	9 12				
Unit-V	Bioenergetics and Metabolism					
	Principles of Bioenergetics.					
	Modes of energy production- Photophosphorylation, Subst	rate level phosphorylation,				
	Oxidative phosphorylation					
	Catabolism- Carbohydrates-(Aerobic and Anaerobic); Prot	eins- (Proteolysis,				
	Transamination, Deamination) and Fats/Lipids- (Beta oxid	lation)				
	Bacterial photosynthesis	SE SE				

List of Practicals

- 1. Isolation of microorganisms by streak plate method.
- 2. Isolation of microorganisms by pour plate method.
- 3. Growth of microorganisms on agar slants and agar stabs
- 4. Growth of microorganisms in broth.
- 5. Qualitative detection of carbohydrates, proteins and lipids.
- 6. Effect of environment on bacterial growth: a. Temperature b. Osmotic pressure c. pH
- 7. The lethal action of Ultraviolet light on growth.
- 8. The oligodynamic action of heavy metals on bacterial growth.
- 9. Comparative evaluation of antimicrobial agents.
